

Medical Billing for Specialty Clinics Requires a Team of Experts

Since 1994, NEMB has helped specialty clinics manage their medical billing. Often, clinic's internal billing offices struggle to stay current with technology in the industry. Errors in billing, delayed billing and not having staff to adequately work rejected claims costs clinics where it hurts the most; their bottom line. Our flexible business model, regional teams, and advanced billing technology create immediate outcomes for specialty clinics.

We work on your medical billing systems or provide our medical billing system. It is our goal to ensure your transition to NEMB is easy and seamless. Clinic administrators across the country have benefitted from our high standards and expertise.

Our process for specialty clinic medical billing:

CLINIC

SPECIALTY CLINICS BILLING

Why We Are the Right Choice

Where most specialty medical clinics run at more than 20% in 90 days+ A/R, our clients enjoy less than 10% average in overall 90days+ A/R. We do this by making sure all charges and payments are processed and placed in the system for payment within 48 hours of receipt from your office. We work denials and insurance rejections within 48 hours of receipt. We maintain state-of-the-art technology and are continuously updating to be sure our processes are the most efficient. We answer your questions within 48 hours and provide the customized reports and dashboards you need to know exactly where your business stands at any given time.
